SOFTWARE PROJECTS

Mobile Dictionary - Flutter, firestore

- Developed an Android app using Flutter and firebase as the database.
- It helps to add words in the dictionary.
- User privilege was integrated in the app.
- Users can view the words, but only admin can CRUD words.

Web development Website - HTML, CSS, Bootstrap

- Developed using HTML, CSS and bootstrap.
- Designed based for a web development company.
- It includes the services and the company profile with one page site.
- Hosted the website in **Hostinger** using **FileZilla Client**.
- Check out the site www.kiteupnow.com

Pharmacy Management application - Java, MySQL

- Developed using NetBeans IDE, which the UI also can be developed on that.
- Used Java for the functional and logical works.
- Database was created by MySQL, which is a relational structure.
- Generated Jasper reports for different process.

Website for Hospital - HTML, CSS, Bootstrap, JavaScript, Java Servlet, MySQL

- Basic website using HTML, CSS and bootstrap.
- Admin privilege was given for the website.
- Real time changes will take place, using Java Servlet with the integration of JavaScript and MySQL as the database for the website.

Project worked in eBuilder – React JS, Balsamiq

- Used React JS for the frontend development.
- React v17, where using with the Hooks and functions.
- Wireframe development using Balsamiq.
